

Fast & Secure Payments

Offset up to 99% of your credit card processing fees.

Every time a customer pays with a card, you lose 3-4% on that transaction. We don't think that's fair for restaurants. That's why Lavu rewards your customers when they pay with cash. Imagine how much you'll save in a year!

- 1 When customers pay with a card, their bill includes a non-cash adjustment.
- 2 Customers can avoid the charge by paying with cash. The bill is completely transparent.
- 3 When the customer pays with cash, they save. If they use a card, it includes the fee to offset your processing charges.
